ABOUT ME

Passionate MERN Stack Developer with hands-on experience in building dynamic, responsive, and high-performance web applications. Proficient in MongoDB, Express.js, React, and Node.js, with strong skills in designing RESTful APIs, optimizing database performance, and delivering scalable, maintainable code. Adept at collaborating in cross-functional teams to drive efficient and impactful solutions.

WORK EXPERIENCE

MERN STACK DEVELOPER (TRAINEE) GRASS SOLUTIONS, JAIPUR | 2025 - PRESENT

- Developed and maintained full-stack web applications using the MERN Stack.
- Designed and implemented RESTful APIs for seamless frontend-back communication.
- Optimized database queries to enhance application performance.
- Collaborated with UI/UX designers to improve application usability and responsiveness.

PROJECTS

Make A Trip - An travel application

A full-stack travel application that allows users to search, plan, and book trips with ease. Features include destination listings, hotel and transport booking, user authentication, and a responsive UI for seamless experience across devices. The backend handles secure data transactions, RESTful API endpoints, and real-time updates for trip availability. Admin dashboard allows for trip management, user control, and analytics.

Whisper - An Real time chat application

A real-time chat app enabling users to send and receive instant messages using Socket.io. Includes user authentication, private chat rooms, and a responsive UI. Backend handles real-time communication, message storage, and secure user sessions.
